Section IV
One-Hundred Year Flood Protection

MODIFIED CONSENT DECREE
SECTION XIX, PARAGRAPH 57d

Paragraph 57d: Requires the Board to annually report on the progress of construction of facilities to protect the East Bank Treatment Plan from a one-hundred (100) year flood.

2011 Work Accomplished:

- The Board staff has begun the design, procurement, and installation of a 4-meg emergency generator for the East Bank plant. Through Sewerage and Water Board contract 3629, the 4 MW generator was purchased at a price of $2,759,559.00 and is being manufactured for delivery.

- Generator Building - The Sewerage and Water Board contract #3628 was rejected by the Board. Contract 3681 was let to replace it. Through the new contract, #3681, the Board has started construction. Current estimated construction cost is $7,498,000.

- Through contract 3661, the Board has completed the design phase and awarded a construction contract to raise the berm around East Bank Wastewater Treatment Plant in the amount of $24,391,466.00.

- The Board has met the requirement to provide a report on the progress of construction of facilities to protect the East Bank Plant from a one-hundred year flood.
