This value is based on an estimate of the taxes originally included in the contract that had not yet been paid as of the issuance of the Tax Exempt Certificate. RFC-112 also included a correction (credit for \$62,194.59) for the discrepancy that occurred during the authorization of FCO-002.

**RATIFICATION OF CHANGE ORDER NO. 5 FOR CONTRACT 1418 –  
CARROLLTON WATER PLANT UTILITY RACK**

**WHEREAS**, on January 3, 2023, the Sewerage and Water Board (Board) entered into Contract 1418 with M.R. Pittman Group, LLC (MRPG) in the amount of \$32,215,000.00 for the construction of The Utility Rack at the Carrollton Water Plant; and

**WHEREAS**, the Executive Director, by Executive Director's Approval of Change Order ED-008-2023, approving two Field Change Orders (FCO). FCO-001 and FCO-002 authorized the purchase of The Construction Management Office (CMO) office space and modifications to the mudline line stop, respectively, with Change Order 1 in the amount of \$361,839.03 on April 20, 2023; and

**WHEREAS**, The Board, by R-084-2023, approved Change Order 2 on July 17, 2023, increasing the contract by \$148,962.91. Change Order 2 included FCO-003, the cutting and splicing of piles to reduce the pick weights and fall radius of the piles as they were being set by the crane; and

**WHEREAS**, The Board, by R-102-2023, approved Change Order 3 on September 20, 2023, decreasing the contract by \$523,135.87. Change Order 3 included two FCOs. FCO-004 accounted for the clearing of underground interferences MRPG encountered while in Segment C. FCO-005 accounted for the instruction to MRPG to provide a value for the state and local taxes that were yet to be paid as SWBNO issued Louisiana Department of Revenue Form R-1020, designating MRPG as its agent for the purpose of making sales tax exempt from purchases; and

**WHEREAS**, The Board, by R-108-2023, approved Change Order 4 on November 17, 2023, increasing the contract by \$115,579.37. Change Order 4 included three FCOs. FCO-006 was a change to the East Transition Structure to address discrepancy between design pile cut-off elevation and the actual ground elevations at the pile locations. FCO-007 was a partial credit back to SWB for FCO-003, based on a revised proposal from MRPG that accounts for cost savings to MRPG. FCO-008 was for modifications to Table Tops 31 and 32, due to conflicts encountered during the potholing process, leading to modifications in the locations of piles #44, #46, and #50; and

**WHEREAS**, This Change Order 5 includes two FCOs that are being issued unilaterally with approved costs as determined by the CMO with the opportunity for MRPG to present further justification to substantiate additional claims. FCO-009 is for various underground interferences MRPG encountered while in Segment D. FCO-010 is for slab demolition that was not accounted for on the original contract drawings under Piles 20N and 21. This Change Order increases the Contract Amount by \$460,816.11 for a revised Contract Amount of \$32,779,061.55, bringing the total Change Order amount to \$564,061.55, or 1.75% of the Original Contract Amount.

**NOW THEREFORE BE IT RESOLVED**, Change Order 5 for Contract 1418 is hereby ratified by the Sewerage and Water Board of New Orleans increasing the Contract Amount by \$460,816.11, bringing the Contract total to \$32,779,061.55.

**Purpose and Scope of the Contract:**

*Brief description of original contract scope.*

*The SOW for Contract CP-1418 Utility Rack includes supply, fabrication, and installation of approximately 1,700 linear feet of galvanized structural steel utility rack, including forty-nine electrical conduits and one 8-inch natural gas pipeline which will connect the new power generating equipment at the WPC within the C7 basin to the existing power infrastructure located on the east side of the SWBNO property at Central Control and Turbine 6.*

*FCO-009 - Demo Activities for Pile Installation at Segment D - \$167,661.69: Potholing of Segment D was required to clear potential interferences prior to pile installation. During this effort, several obstructions were encountered that resulted in extra work including shifting pile locations, conducting additional potholing, and performing demolition of obstructions in conflict with piles. Demolition*

activities included removal of approximately 20 feet of duct bank in conflict with Piles 42 and 43 and demolition of an unknown duct bank near Pile 54. Various other activities were required during installation of Segment D piles such as installation of sheeting / shoring at Pile 44 and 46 to allow excavation to greater than the 10 foot depth as well as water management at specific pile locations where Board water lines had excessive leaks and made excavation difficult. For example, a significant leak in a 24" water line near Pile 50 was repaired as part of this WCD.

FCO-010 - Piles 20N and 21 Slab Demo - \$293,154.42: During initial efforts of potholing Piles 20N and 21, a 6" PVC line, part of an abandoned drainage system, was discovered. It was determined that this 6" PVC could be removed or otherwise ignored during installation of these piles. In addition to the 6" PVC, the presence of a lower slab, part of the former C-basin south wall, was brought to the Contractor's attention and subsequently confirmed via additional potholing efforts at these locations to a depth of 12-15 feet deep (potholing is required prior to installation of piles to a minimum depth of 10 feet below existing grade). Note that this slab was previously identified during pre-construction potholing efforts conducted by Boh Brothers as well as indicated on Reference Drawings included with the Contract Documents and "technical data." It was not, however, clearly shown on IFC drawing 12181-W25 (Sheet No. 16 of 137). The Owner authorized Contractor, via WCD-007, to proceed with efforts to demolish slab to accommodate pile installation as extra work under reasonable and justifiable costs.

**RATIFICATION OF CHANGE ORDER NO. 5 FOR CONTRACT 1376 – WATER HAMMER HAZARD MITIGATION PROGRAM – HIGH LIFT PUMPING STATION AND PANOLA PUMPING STATION**

---

**WHEREAS**, on December 15, 2021, by Resolution R-127-2021, the Sewerage and Water Board of New Orleans awarded Contract 1376 to M.R. Pittman Group, LLC in the amount of \$20,130,000.00 for Water Hammer Hazard Mitigation Program – High Lift Pump Room and Panola Pumping Station Improvements; and,

**WHEREAS**, the Executive Director, by ED-009-2023 approved Change Order 1 authorized the addition of Special Conditions for FEMA Compliance to the Contract Specifications per FEMA’s guidance. This Change Order 1 did not change the Contract Times or Cost; and

**WHEREAS**, the Executive Director by ED-012-2023 approved Change Order 2, decreasing the Contract Cost by \$662,138.62 and adding 118 days to the Contract Times. Change Order 2 included 11 Field Changes including piping modifications due to existing conditions, additional exploratory excavations, an additional pump inspection, changes to the pump rehabs as a response to discoveries made during the inspections of the pumps, a time extension due to the SWB’s inability to release Panola Pumping Station for operational reasons, deduction of a line stop from the contract, and mitigation of excessive water intrusion in the project site; and

**WHEREAS**, the Board by R-066-2023 approved Change Order 3 on June 21, 2023, increasing the Contract Cost by \$1,098,525.08 and adding 87 days to the Contract Times. Change Order 3 included the addition of an electric motor to High Lift Pumping Station. Since 1961, the High Lift Pumping Station, a critical component of the water distribution system, has been composed of two pumps driven by steam turbines. As the power plant primarily relied on steam for the steam-turbine generators, the configuration was practical and efficient. However, in recent years, Operations’ reliance on steam has reduced, and, in 2019, after a failure of High Lift Pump A’s gearbox, staff converted the steam driven pump to a pump with an electrically driven motor by procuring and installing one. In the following years, Pump B, the other steam-driven pump, experienced multiple failures, but maintenance staff returned the turbine to service each time. With that came the recommendation to replace the steam turbine with an electric motor to match Pump A. Staff requested a proposal from the contractor to purchase and install an electric motor on Pump B and commission the pump and motor at the same time. Performing this work at the same time maximizes efficiency and minimizes liability for staff; and

**WHEREAS**, the Board by R-100-2023 ratified Change Order 4 on September 20, 2023 increasing the Contract Cost by \$461,310.49. Change Order 4 included the coating and waterproofing of the Panola Pumping Station Clearwell. The Panola Pumping Station Structure, nearly a century old, still consists of the original structural elements and concrete finish. In a move to be proactive, staff evaluated the structure and decided to add an epoxy coating to the clearwell of the station, which is the suction bay for the pumps. Staff determined that for this construction, the clearwell was isolated and empty for the first time in decades, and required a significant amount of effort to accomplish; and

WHEREAS, this Change Order 5 includes the repair to a sewer line and cleanout to the NORD Facility on Leonidas St. adjacent to the site, the abandonment of vents and a trench inside the Panola Pumping Station, and a resolution to a conflict with a bypass line and a pilaster. Due to the need to perform this Work without delaying the Contractor, Staff directed the Contract to perform the Work and have this Change Order Ratified by the Board of Directors. This Change Order increases the Contract Amount by \$87,673.02 for a revised Contract Amount of \$21,115,369.97, bringing the total Change Order Amount to \$985,369.97, or 4.9% of the Original Contract Amount.

**NOW THEREFORE BE IT RESOLVED**, Change Order No. 5 for Contract 1376 is hereby ratified by the Sewerage and Water Board of New Orleans, increasing the Contract Amount by \$87,673.02 for a revised total Contract Amount of \$21,115,369.97.

**FCO-015-NORD Sewer Line Repair and Cleanout:** WCD-009 was issued requesting the contractor to add a two-way 6" sewer cleanout with a concrete collar and cast iron cover to protect the cleanout. This FCO also includes the replacement of an existing clay sanitary sewer line discovered during this site excavation. The existing clay line was found to be broken in multiple locations prior to the contractor's work. Because of the numerous breaks in the line, it was more cost effective to replace the line instead of repair it. **\$25,184.28**

**FCO-016-Panola Trench Fill and Vent Abandonment:** WCD-012 was issued to the contractor to fill a unforeseen concrete trench discovered in the valve pit at Panola Pump Station and to cut off below grade and fill two abandon air vents found on the east wall of the valve pit. Since the trench effected the installation of the new piping in the valve pit, the contractor filled the trench with reinforced concrete, whereas the vent were fill with flowable fill. **\$42,701.57**

**FCO-017-Panola Pump Station South Bypass Relocation:** RFI-024 was submitted by the contractor because of the discovery of a conflict with the south bypass line and a concrete pilaster. The contractor was directed to move the bypass line 4' to the west to avoid this conflict and to preserve the structural integrity of the pilaster. **\$19,787.17**

## SWBNO SAFETY REPORT

## Executive Summary

We are pleased to present the December 2023 Safety Report. The purpose of this report is to present data tracked by the Safety Department, Risk Management Office, Claims Office, Accident Review Board, and the Workers' Compensation Office, and to provide a summary of actions taken to improve employee safety and reduce risks in our operations. The data collected by the departments are analyzed on a monthly basis for both leading and lagging indicators to identify emerging risks, measure the impact of previously implemented policies, and to pinpoint areas of operations where additional safety training would be most beneficial.

December's Safety Report data shows that open Workers' Compensation claims are down nearly 39% over the past year. Open extended Workers' Compensation claims (those open longer than one year) are down over 21% from this time last year. Each claim that remains open is being analyzed and monitored by Workers' Comp to ensure that the claims are being handled in the most cost-efficient manner possible in an effort to control overall costs.

At year's end, 754 current active employees (59%) have completed either OSHA 10, OSHA 30, or both, which is up from 52% at the end of last year. In addition to OSHA training, Safety and Risk Management have begun requiring defensive driving training of all new drivers as well as incorporated Smith System driver training into the Board's fleet safety curriculum for each driver.

Risk Management and Safety will continue to tailor training opportunities and resources to employee and departmental needs to ensure that Board employees can work as safely as possible throughout the new year.

Please note that this report is the product of a collaboration between the Safety and Risk Management departments, and is broken down into five sections:

1. Safety
2. Accident Review Board
3. Workers' Compensation
4. Claims Office
5. Risk Management

## Safety Incident Investigation Report

Below is the Safety Incident Investigation tracking report for incidents that required a Safety Investigation. The report outlines the events leading up to the incident and recommended action to prevent the same type of incident from happening again.

Department	Date of Incident	Description	Recommended Action	Closed Date
Grounds Maintenance	12/18/2023	While entering a dump truck, employee placed his foot onto the dump truck step and slipped, causing injury to his left thigh.	The Safety Department recommends that managers conduct safety talks and ensure employees conduct Job Safety Analyses (JSA's) when working in wet and slick conditions. It is also recommended that safety talks address proper arrangement and placement of wet work boots on lifts, ladders, and steps. Safety talks should also instruct employees in using three points of contact when entering and exiting work trucks.	12/21/2023
Machine Shop	12/18/2023	Employee was unloading a motor with a forklift. While moving the motor, he stopped suddenly, causing the motor to roll off the forklift. No one was injured.	The Safety Department recommends that all employees who conduct lifting and transporting of equipment are trained on rigging operations. It is also recommended that the training be evaluated for effectiveness. It is recommended that managers develop Standards, Policies or Administrative Controls (SPACs) for transporting heavy equipment and ensure SPACs are readily available for employees as needed.	12/27/2023

## ARB CLASSIFICATION DESCRIPTIONS

### Offense Classifications

A preventable “Vehicle”, “Heavy Equipment” and “Non-Vehicular” accident falls into one of three classifications, Class I, II, or III, defined as follows:

- **Class I Accident** is an accident in which the involved employee(s) shared a portion or all the responsibility for its occurrence. The potential severity of a Class I accident is considered by the ARB to be minor in nature. A Class I accident remains on an employee’s record for one (1) year.
- **Class II Accident** is an accident in which the involved employee(s) shared a portion or all the responsibility for its occurrence. The potential severity of a Class II accident is considered by the ARB to be of serious consequence. A Class II accident remains on an employee’s record for two (2) years.
- **Class III Accident** is an accident in which the involved employee(s) has flagrantly disregarded traffic laws and safe driving or operational practices. Any accident in which there is the potential for loss of life, severe, and long-lasting debilitating injuries and/or extensive property damage is classified as a Class III accident. A Class III accident remains on an employee’s record for three years.

## Workers' Compensation Monthly Claims Statistics

**Medical Only:** Of the 3 claims, 2 claims required medical treatment only and the employees returned to work within a week.

**Lost Time:** Of the 3 claims, 1 claim required medical treatment and paid wages as the employees were not able to return to work within the week of the injury.

**Goal:** The Safety Department will evaluate claims in a timely manner that ensures proper Personal Protective Equipment (PPE) and safety training are made available to department managers to reduce accidents. The Workers' Compensation Office will evaluate claims in a timely manner that ensures prompt medical treatment so that employees are returned into the workforce as efficiently and medically stable as possible. This will aid in maintaining an active and healthy workforce.

## Workers' Compensation Personal Protection Equipment (PPE) Monthly Statistics

Workers' Compensation tracks the use of Personal Protection Equipment (PPE). This safety equipment should be used during work activity to protect against health and safety risks. The information below details the use of PPE as it relates to the body part injured as a result of the accident.

These claims include those that had open payroll indemnity benefits; settlement of medical-only claims is not included. Underlined dates represent settlements finalized in the current Safety Report's reporting period.

\*Although there was no statutory future indemnity exposure, indemnities were still being paid, and would have continued to be paid in the absence of settlement or termination of indemnities, which likely would have resulted in litigation and associated costs.
