RATIFICATION OF CHANGE ORDER NO. 4 FOR CONTRACT 1415 – WEST POWER COMPLEX FOUNDATIONS AND UNDERGROUND PACKAGE

WHEREAS, on April 28, 2023, the Sewerage and Water Board (Board) entered into Contract 1415 with M.R. Pittman Group, LLC (MRPG) in the amount of \$33,622,255.00 for the construction of West Power Complex Foundations and Underground Package at the Carrollton Water Plant; and

WHEREAS, the Executive Director, by Executive Director's Approval of Change Order ED-025-2023, approved five Field Change Orders (FCO). FCO-001, FCO-002, FCO-003, and FCO-004 each resulted in a credit to the Contract by reducing dynamic pile testing requirements, extending tax exempt status to the Contractor for materials purchases, changing the materials of conduits, and removing the Special Inspection services required of the Contractor. FCO-005 required the Contractor to perform additional exploratory work. These Changes collectively reduced the Contract Amount by \$1,147,755.43, for a revised Contract Amount of \$32,474,499.57; and

WHEREAS, the Executive Director, by Executive Director's Approval of Change Order ED-003-2024, approved seven Field Change Orders (FCO-006 through FCO-012). These changes included additional cathodic protection for fuel oil piping, additional duct bank support piles, a relocation of a static test pile, a retest of a static test pile, additional restrikes for test piles, resolving underground obstructions, and a change to the retaining wall. These changes collectively increased the Contract Amount by \$557,188.12, for a revised contract Amount of \$33,065,066.88; and

WHEREAS, the Board of Directors, by Resolution R-037-2024, approved Change Order 3 which included four FCOs: FCO-013, FCO-014, FCO-015, and FCO-016. To help achieve the goal of commissioning the new Power Complex by Hurricane Season of 2025, staff took steps to expedite the multiple construction projects. Notably, the equipment purchases were solicited as separate purchases ahead of the construction project. However, from a design standpoint, this method posed challenges, requiring the foundation package to be designed prior to the final equipment layouts being delivered by the equipment manufacturers. FCO-013 addresses some of the changes required to the foundations, including additional piles, manholes, piping and other items. FCO-014 modified a design to a siphon to accommodate existing conditions. FCO-015 modified the length of the piles for the Operations Center Building to align with the results of the test piles performed by Contract 1415. FCO-016 increased the size of the Generator Step-Up Transformer Foundation to align with the final equipment submittal. Change Order 4 increased the Contract Amount by \$1,923,192.27 for a revised Contract Amount of \$34,988,259.15; and

WHEREAS, this Change Order 4 includes one FCO, FCO-017, for additional supports and piles already driven and purchased for electrical manholes which increased the quantities from the Unit Price Bid Form. This Change Order increased the Contract Amount by \$234,043.79 for a revised Contract Amount of \$35,223,302.94, bringing the total Change Order amount to \$1,601,047.92, or 4.7% of the Original Contract Amount.

NOW THEREFORE BE IT RESOLVED, Change Order 4 for Contract 1415 is hereby ratified by the Sewerage and Water Board of New Orleans increasing the Contract Amount by \$235,043.79, bringing the contract total to \$35,223,302.94.

<u>FCO-017 - Electrical Manhole Supports - \$235,043.79</u>: The change is for adding supports for electrical manholes and was issued in Work Change Directive No. 009. Supports were needed for electrical manholes requiring 14" x 96' piles and pile caps. Seven (7) electrical manholes needed supports with each support requiring 3 piles and 1 pile cap, bringing the change to require 21 additional piles and 7 pile caps. 3 locations for piles required break out of concrete struts. A design development which is removing the BOP area underground duct bank caused 6 out of the 7 manhole supports and 18 out of the 21 piles to not be required. 18 of the 21 piles are already driven and 0 out of the 7 manhole supports have been installed but 1 will still be needed and remains on the COR.

For the month of March 2024, there were two construction projects with DBE participation offered for final acceptance.

Contract #1447 – Carrollton Water Plant Boiler House Fan Modifications

DBE Goal:	25.00%
DBE Participation Achieved:	3.95%
Prime Contractor:	Walter J. Barnes Electric Co., Inc.
Closeout Date:	February 2024

The prime contractor did not meet the 25% Goal established for this project. Barnes Electric projected 27% DBE subcontracting opportunity to Carter Electric Supply, LLC to supply transformers and electrical panels, perform the removal, rewire, and install of motors, and supply and install, test, and start-up the modified Switchgear Bucket. Carter Electric was able to self-perform supply of transformers and electrical panels, but due to specialized nature of work had to subcontract the removal, rewire, and install of motors, and supply and install, test, and start-up the modified Switchgear Armature Services, LLC. When Bollinger withdrew from the project during its course, Carter Electric was unable to contract with another company to meet the remaining goal.

EDBP accepts the DBE participation and recommends approval for Final Acceptance.

Contract #2158 – Water Main Point Repairs, Water Service Connection, Water Valve and Fire Hydrant Replacement

DBE Goal:	36.00%
DBE Participation Achieved:	34.51%
Prime Contractor:	Wallace C. Drennan, Inc.
Closeout Date:	April 2024

The prime contractor did not meet the 36% Goal established for this project. In a submitted Documented Good Faith Effort, the prime contractor states that scope changes requested by SWBNO to perform Emergency Work reduced DBE subcontracting opportunities, affecting the overall DBE participation percentage. This claim is supported by staff project management.

EDBP accepts the DBE participation and recommends approval for Final Acceptance.
