Grey Lewis, Chief Financial Officer, presented an update on the Preliminary May 2024 financial results and liquidity position, as it is critical that SWBNO maintain sufficient cash flow levels to continue operations, and meet bond covenant requirements. The May 2024 Water and Sewer cash levels (182 / 168-Days Cash on Hand, respectively) exceed the minimum and target thresholds based on month end cash and budgeted expenses and additionally debt service coverage is within the budgeted forecast.

## SWBNO SAFETY REPORT

## Executive Summary

We are pleased to present the June 2024 Safety Report. The purpose of this report is to present data tracked by the Safety Department, Risk Management Office, Claims Office, Accident Review Board, and the Workers' Compensation Office, and to provide a summary of actions taken to improve employee safety and reduce risks in our operations. The data collected by the departments are analyzed on a monthly basis for both leading and lagging indicators to identify emerging risks, measure the impact of previously implemented policies, and to pinpoint areas of operations where additional safety training would be most beneficial.

In June, the Safety Department provided training to Networks employees on the proper use of cutting tools to minimize the number of injuries caused by employees using saws, drills, snips, shears, and other tools with cutting edges. Safety emphasized the importance of being adequately trained on the use of the tool before conducting work tasks, appropriate use of personal protective equipment, the use of the correct tool for the job, and avoiding overloading the capacity of the tool or applying excess pressure while working. Safety will continue to offer the training in the months ahead.

The Safety Department has also been monitoring extreme heat conditions, which sharply increase the risk of heat-related illnesses for employees. When extreme heat is anticipated, the Safety Department reaches out to managers and supervisors to ensure that leadership is aware of the heightened risks and has been providing guidance on how to mitigate the health hazards presented by working in extreme heat. Specifically, Safety has been encouraging frequent rest breaks, adequate hydration, and constant monitoring of employees' conditions to prevent heat-related illness incidents from occurring on work sites.

There were four reported digging/excavating incidents in June; preliminary investigations indicate that at least three of the incidents were the result of utilities failing to mark or incorrectly marking their underground facilities. All four incidents will be investigated thoroughly by the Accident Review Board.

Please note that this report is the product of a collaboration between the Safety and Risk Management departments, and is broken down into five sections:

1. Safety
2. Accident Review Board
3. Workers' Compensation
4. Claims Office
5. Risk Management

## Safety Incident Investigation Report

Below is the Safety Incident Investigation tracking report for incidents that required a Safety Investigation. The report outlines the events leading up to the incident and recommended action to prevent the same type of incident from happening again.

Department	Date of Incident	Description	Recommended Action	Closed Date
Networks	5/28/2024	While lifting a manhole cover for a sewer inspection, employee felt a pain in his right shoulder.	The Safety Department recommends all employees in the Networks Emergency Department are trained on using a manhole hook to lift and remove manhole covers to reduce the risk of injury. Supervisors and managers are responsible for training and equipping employees with the proper tools required to safely complete job tasks. Employees are responsible for using the proper tools. These preventive actions should be immediately implemented.	6/4/2024
Revenue	6/3/2024	Employee was sitting at her desk and was stung on the neck by a bee.	The Safety Department recommends all Board employees monitor their work areas and cubicles for insects such as wasps, bees, and spiders to reduce the risk of bites and stings. Employees should immediately notify Building Engineering if insects are found in the workspace. The Safety Department also recommends the Building Engineering Department check buildings for any open areas or access points for insects, and secure those areas to minimize insects entering Board buildings. The Safety Department recommends the Building Engineering Department have an exterminator spray the area to mitigate the hazard. These preventive actions should be immediately implemented.	6/10/2024

# ARB CLASSIFICATION DESCRIPTIONS

## Offense Classifications

A preventable “Vehicle”, “Heavy Equipment” and “Non-Vehicular” accident falls into one of three classifications, Class I, II, or III, defined as follows:

- **Class I Accident** is an accident in which the involved employee(s) shared a portion or all the responsibility for its occurrence. The potential severity of a Class I accident is considered by the ARB to be minor in nature. A Class I accident remains on an employee’s record for one (1) year.
- **Class II Accident** is an accident in which the involved employee(s) shared a portion or all the responsibility for its occurrence. The potential severity of a Class II accident is considered by the ARB to be of serious consequence. A Class II accident remains on an employee’s record for two (2) years.
- **Class III Accident** is an accident in which the involved employee(s) has flagrantly disregarded traffic laws and safe driving or operational practices. Any accident in which there is the potential for loss of life, severe, and long-lasting debilitating injuries and/or extensive property damage is classified as a Class III accident. A Class III accident remains on an employee’s record for three years.
