2. **CASH FLOW OVERVIEW**

Grey Lewis, Chief Financial Officer, presented an update on the March 2025 Preliminary financial results and liquidity position, as it is critical that SWBNO maintain sufficient cash flow levels to continue operations, and meet bond covenant requirements.

March 2025 revenues were \$17.4 below budget by \$5m below budget driven by a lower amount of bills issued. April has rebounded at \$27.6m above budget with 162k bills issued. Bill Volatility for the first 4 months of the year has existed with May looking to be a smoother month in terms of the billing cycles production. Smart meters have reached 110,000 with the project to reach substantial completion on residential customers by later this summer. Cash collections were up in March (\$20.6m) and April (\$21.7m) after a slower start to the year.

Operating expenses \$19.4m in March 2025 were well below conservatively set budget. The year end activities for the annual audit are well under way with the audit required to be done by next month. Past due receivables have remained flat at around \$65m with 11k of 25k customers past due not part of promise pay payment plan.

Susannah Kirby, Chief Customer Service Officer, presented on restructuring underway in Customer Service / Revenue to drive initiatives related to Smart Meter Delinquency monitoring, Overall collections efforts being more timely and Close tracking of Service Orders which drive workflow processes in the billing system. Additional resources have been added with CSM training and development of a manual of procedures to more timely address SM delinquency. Action lists have been provided to staff to address workflow items which were not previously able to be pulled from CSM Cogsdale with clear actionable steps. The presence of Protiviti Government Services as management consultants has brought 3-4 senior level consultants to

augment staffing on the AR project. Management also reported on a parallel project to procure the next CIS system to replace CSM Cogsdale in the next couple of years after Smart Metering.

Zach Unger, Director and Sharon Chun, Senior Consultant of Protiviti presented on their phase 1 involvement in the AR project over the past several months including direct access in the billing system and gaining an understanding of the operating environment and typical data and reporting challenges being incurred with CSM Cogsdale. Protiviti covered workstream objectives, Key accomplishments, and next steps for their study of roughly 25,000 past due customers. Customers with arrearages were grouped to isolate instances of successive nonpayment months, water meter service orders, estimated reads and penalties assessed. Further on to the collections business workflow, Protiviti noted missing steps that need to take place in the billing system to fully complete the business workflow so all notice and collection activities will occur. Due to the plans to replace the system and SWBNO lack of mature process that prevent / detect errors timely, Protiviti discussed several paths to execute improvements and train staff and mid-level managers to oversee clerical actions. Further information on a Phase 2 proposal will be shared with Management. Information gathered with the help of Protiviti is being used to drive further enrollment into Promise pay payment plans.

Purpose and Scope of the Contract:

The West Power Complex (WPC) Equipment Installation and Commissioning Project (the “WPC Project” or “Project”) scope of work (the “Work”) combines several functional elements to achieve an interconnected highly reliable mega-watt scale power supply and distribution system between the 60-Hz Utility source and the 60-Hz and 25-Hz loads on the SWBNO managed electrical network. The intent of the WPC Project is to improve the resiliency and reliability of critical SWBNO managed electrical network infrastructure.

The Work includes offloading and installing Owner-provided equipment packages including Static Frequency Converters and associated 25-Hz and 60-Hz transformers, interim 25-kV switchgear, auxiliary switchgear, combustion gas turbine (CTG) and associated equipment (electrical enclosure room, fuel gas compressor, and auxiliary transformer), and two (2) Generator Step Up (GSU) transformers. Mechanical work includes installation of and interconnection of CTG equipment, interconnection of natural gas piping, interconnection of fuel oil piping and fuel oil forwarding system, compressed air system, water piping, and drain piping. Structural work includes offloading Owner-provided equipment, fabrication and installation of elevated steel platforms, handrails, and ancillary items. Electrical work includes installation and interconnection of Owner-provided equipment and supply of miscellaneous electrical system elements. Instrumentation and controls (I&C) work supply and installation of fiber optic patch panel and networking cabinets, fiber connections, and installation and calibration of instrumentation supplied with Owner-provided equipment. The Work also includes testing, startup, and commissioning to demonstrate a safe, reliable, resilience, efficient power system.

FCO-011, 25Hz Outdoor Switchgear Repairs - On 04 February 2025, the CMO issued WCD-009, 25Hz Outdoor Switchgear Repairs, directing Contractor to perform repairs on the 25Hz Switchgear located in PFC, which will ultimately replace the existing 25Hz Outdoor Switchgear. The sprocket responsible for pulling in the breaker was missing its screw, and the threads where the screw should be installed were damaged due to an improper 'breaker racking' mechanism. These issues will be repaired and resolved by Contractor as part of this work change. On 15 January 2025, Contractor submitted COR-015 for a total of \$14,098.00.

FCO-012, Deflection Fittings For NSBD Tap Box Conduit Routing - In order to address the comments returned on Submittal 34.2, Busduct Conduit Routing Shop Drawings, Figure 4, the JV submitted COR-016 Rev. 2 requesting compensation for a change in scope including the addition of 2 deflection fittings in the vertical run of conduit from the 90-degree bend in the utility rack to the top of the non-segregated bus duct/cable tap box (NSBD tab box), as well as additional supports at the NSB tap box interface. While expansion and stress relief at this interface were contract requirements, the vertical and horizontal movement anticipated was new information. This FCO provides compensation for roughly 60% of the total cost of this work based on contractor negotiations. On 13 March 2025, Contractor submitted COR-016 Rev. 2 for a total of \$174,675.00.

FCO-013, Central Control G1 Breaker Mods - On 26 February 2025, the CMO issued WCD-013, Central Control Breaker Modifications, instructing the Contractor to proceed with the modifications of breaker cubicle G1 for SFC-1's interface into the ring bus located in Central Control. This scope entailed swapping out the 1200A breaker and its associated components inside breaker cubicle G1 with the 2000A breaker and its associated components inside breaker cubicle TR2. On 03 March 2025, Contractor submitted COR-019 for a total of \$66,575.00 to perform the modifications on the breaker cubicle.

FCO-014, CT Replacement for PDC-2 - The 24kV switchgear, manufactured by Powell, currently has CTs installed that are too small to pass multiple conductors per phase of the 25kV 750MCM cables through. On 12 March 2025, the CMO issued ITC-018, CT Replacement for PDC-2, requesting a proposal for the supply of seven (7) Current Transformers (CT) for the 24kV switchgear cubicles in PDC-2 in accordance with the model number listed below. On 07 April 2025, Contractor submitted COR-018 Rev. 1 for a total of \$19,219.00 to supply seven (7) elongated CTs for replacement within the PDC-2 switchgear.

Spending to Date:

Cumulative Contract Amount (as of 04/22/25)	\$409,163.17
Cumulative Contract Spending (as of 04/22/25)	\$25,054,568.76

Contractor's Past Performance:

Major work completed thus far includes setting of SFC-1, SFC-2, SFC-3, CTG-7, PDC-1, PDC-2, & EER equipment enclosures, and offloading and setting all transformers. Cable pulling, cable terminations, raceway installations, equipment interconnections and commissioning activities are ongoing. All major equipment deliveries have been received and are onsite.

SWBNO SAFETY REPORT

Executive Summary

We are pleased to present the April 2025 Safety Report. The purpose of this report is to present data tracked by the Safety Department, Risk Management Office, Claims Office, Accident Review Board, and the Workers' Compensation Office, and to provide a summary of actions taken to improve employee safety and reduce risks in our operations. The data collected by the departments are analyzed on a monthly basis for both leading and lagging indicators to identify emerging risks, measure the impact of previously implemented policies, and to pinpoint areas of operations where additional safety training would be most beneficial.

In April, the Safety Department began messaging those in leadership positions about the dangers associated with heat-related illnesses, signs and symptoms to look out for, and how to minimize the impact of heat on employee health. The Safety Department will continue to provide information on employee safety as it relates to heat-related illnesses in the coming months, including guidance on proper hydration, rest periods, attire, and how to assist employees who are displaying signs of heat-related illness so that employees can recognize when their co-workers need help and are prepared to properly respond in the field.

April was a relatively good month on the safety front. Although we had two reportable motor vehicle incidents, there were no excavating incidents, PPE use violations, or recordable injuries.

Please note that this report is the product of a collaboration between the Safety and Risk Management departments, and is broken down into five sections:

1. Safety
2. Accident Review Board
3. Workers' Compensation
4. Claims Office
5. Risk Management

Safety Incident Investigation Report

Below is the Safety Incident Investigation tracking report for incidents that required a Safety Investigation. The report outlines the events leading up to the incident and recommended action to prevent the same type of incident from happening again. These incidents are included in the data reported on the usage of proper PPE and were the result of Safety Department investigations closed during the current reporting period, which do not necessarily represent incidents that occurred during the current reporting period.

Department	Date of Incident	Description	Recommended Action	Closed Date	Proper PPE Usage
Networks (Zone 4)	3/28/2025	Employee was driving a tandem truck at Central Yard when he struck a contract employee with the passenger side front of the truck, causing injury to the contract employee's right leg.	The Safety Department recommends that the Security Department ensures all GPS systems are operating properly in all Board vehicles. Safety recommends that there are up-to-date signs on all vehicles warning pedestrians and drivers of safe travel distances and wide-turn vehicles. The Safety Department recommends that managers and supervisors meet with drivers and driver assistants to discuss driver safety and operating trucks in Central Yard with attached trailers. The discussion should include risks, hazards, and awareness while operating oversized vehicles and equipment. Safety also recommends that the dumpster the contract employee was walking to is moved to a safe location, away from its current location, which is a blind spot for drivers making turns. Dumpsters should not be placed in driveways, roadways, or turns. Safety recommends that drivers in Central Yard adhere to posted driving rules, obey stop signs and speed limits, and yield to pedestrians. Extreme caution should be used in areas with blind spots. Drivers are responsible for using safe driving practices. Supervisors and managers are responsible for implementing these preventive actions immediately.	4/10/2025	N/A

Accident Review Board

2007-2025

The Purpose and Mission of the Accident Review Board is to reduce the number of safety related incidents and injuries to Sewerage and Water Board equipment and staff. We strive to reduce incidents by recognizing areas that need improvement and create training opportunities to mitigate any future incidents.

Accident Review Board Data

The graph reflects the information collected in the Safety Unit, ARB folders with 10 or more accidents from 2007-2025 by Department Organization Codes. Please see the next page for ARB Classification Descriptions.

ARB CLASSIFICATION DESCRIPTIONS

Offense Classifications

A preventable “Vehicle”, “Heavy Equipment” and “Non-Vehicular” accident falls into one of three classifications, Class I, II, or III, defined as follows:

- **Class I Accident** is an accident in which the involved employee(s) shared a portion or all the responsibility for its occurrence. The potential severity of a Class I accident is considered by the ARB to be minor in nature. A Class I accident remains on an employee’s record for one (1) year.
- **Class II Accident** is an accident in which the involved employee(s) shared a portion or all the responsibility for its occurrence. The potential severity of a Class II accident is considered by the ARB to be of serious consequence. A Class II accident remains on an employee’s record for two (2) years.
- **Class III Accident** is an accident in which the involved employee(s) has flagrantly disregarded traffic laws and safe driving or operational practices. Any accident in which there is the potential for loss of life, severe, and long-lasting debilitating injuries and/or extensive property damage is classified as a Class III accident. A Class III accident remains on an employee’s record for three years.

Workers' Compensation Monthly Claims Statistics

Medical Only: Of the 2 claims, both claims required medical treatment only and the employees returned to work within a week.

Lost Time: Of the 2 claims, none of the claims required medical treatment and paid wages as the employees were able to return to work within the week of the injury.

Goal: The Safety Department will evaluate claims in a timely manner that ensures proper Personal Protective Equipment (PPE) and safety training are made available to department managers to reduce accidents. The Workers' Compensation Office will evaluate claims in a timely manner that ensures prompt medical treatment so that employees are returned into the workforce as efficiently and medically stable as possible. This will aid in maintaining an active and healthy workforce.

These claims include those that had open payroll indemnity benefits; settlement of medical-only claims is not included. Underlined dates represent settlements finalized in the current Safety Report's reporting period.

*Although there was no statutory future indemnity exposure, indemnities were still being paid, and would have continued to be paid in the absence of settlement or termination of indemnities, which likely would have resulted in litigation and associated costs.
