Prior to beginning the meeting, Mayor Cantrell gave her opening remarks. Mayor Cantrell acknowledged that over the past several weeks, the Sewerage and Water Board experienced several operational issues. The Turbine 5 explosion was significant and resulted in decommissioning that turbine. Despite all of the challenges presented by the explosion, water service to the city was uninterrupted.

REPORT OF THE EXECUTIVE DIRECTOR

Executive Director Ghassan Korban presented a slide overview that focused on the following topics:

- Executive Director Korban started his report by focusing on the T5 explosion. He acknowledged that the public wants to know what caused the explosion, but that won't be determined until the investigation is complete. A compressor that serves as an outside component and control function for T4 had a malfunction and caused T4 to trip offline. As part of a routine process or sequence, operations started T5 to substitute for T4. The resulting explosion was a shock. The pressure of the explosion escaped from underside of the turbine through the ventilation.
- Director Lynes Sloss asked will it be a good time to start "Turbine 7." Executive Director Korban stated its always a good time to consider another turbine. Director Janet Howard asked who will be forming an investigation on the explosion. The Executive Director and staff are coordinating a team of experts from several different departments such Engineering and Safety.
- Executive Director Korban and Councilmember Banks provided clarity to the public with T5 being completely out, SWBNO loses some redundancy, but has adequate power to service what needs to be serviced and keep the pumps working.
- Mayor Cantrell and the Board discussed partnering with outside entities to help Sewerage and Water Board establish a better, more reliable power system.
- Mayor Cantrell and Executive Director Korban thanked the employees in the central control drainage department who were involved in the explosion for their service and dedication to the city and Sewerage and Water Board.
- Drainage Pumping Status
 - 99 of 99 drainage pumps (mitigate rain and flooding)
 - 21 of 21 constant-duty pumps (aka "dry weather pumps" which are used to manage ground water in canals on any given day)
 - Pump 2 at the Panola Pump Station is out of service
 - A 12-inch water main break on Tullis Drive near Cypress Grove Court: West Bank water tower reserve was depleted, and pressure dropped below 20 psi. Repairs were made and pressure was restored.

Variance Analysis for Major Reported Items

Revenues:

The year to date revenues are up compared to budget by \$46.9 million or 17%. These higher revenues are primarily due to receipt of 2019 ad valorem taxes and \$27.6 million dollars received from the Fair Share agreement. Also, Sewer Revenues are higher than the budgeted amount by \$12.5 million or 11% and Water Revenues are higher than the budgeted amount by \$6.5 million or 7%.

2019 YTD REVENUE MIX

Expenses:

Expenses through November are below the budgeted straight-line amount by 13%. While we await a few outstanding energy related invoices that are anticipated, we anticipate ending the year below the approved budget due to conservative spending. To produce a more accurate picture of expenses, debt service payments are reflected in Actual YTD portion of this report. This is a transaction that has been included only at year-end in the past, but we will begin to reflect it here going forward. It should be noted that the 2019 Budget did not include GO Zone payments within the projected debt service, but the actuals include those payments.

Billing Accuracy

The billing and collections division is responsible for the creation and distribution of accurate customer bills, resolving all billing complaints, interfacing with large non-residential customers and ensuring successful collections efforts to ensure the financial solvency of SWBNO. In order to provide for the accuracy of the customer bills, it is necessary to measure and report the actual water use of each customer and ensure the integrity of the system by coordinating account investigations as necessary from either customer inquiries or from staff initiated queries. The following metrics are monitored to help management measure and improve the bill accuracy, improve the customer response time and implement best practice collection activity.

The days-of-cash at November 30, 2019 were 93 days for the water system, 105 days for the sewer system, 138 days for the drainage system and 107 days for the total systems. Combined the total system results were below the minimum policy target of 180 days. Water, sewer, and drainage systems did not meet its policy target of 180 days. However, cash on hand meets both the bond covenant for water and sewer.

SWBNO has a debt service target of 1.50 times for both the water and sewer systems. The bond covenant minimum coverages are 1.25 times for both water and sewer. The 2019 budget meets both the target and covenant requirements with water budgeted at 1.68 times and sewer at 1.58 times. The debt service coverage has not been recalculated here as it is not a relevant monthly measure due to the uncertainty of season changes.

Certification. In connection with the accompanying unaudited monthly financial report of the Sewerage and Water Board of New Orleans for the period ending November 30, 2019, I hereby certify that, to my knowledge, the preliminary information contained in the report presents the financial condition and results of the Board.
