## EXECUTIVE SUMMARY

### June 2020

The end of June 2020 reflects 50% of the year. While actual revenues were ahead of the budget during the first few months, the COVID 19 pandemic has resulted in a reduction of revenues. Year to date, total revenues are now running close to budget. Actual expenditures are less than budgeted expenditures. A summary analysis of the financial results and other performance goals is attached for your further review.

(in millions)	<u>Actual</u>	YTD <u>Budget*</u>	Annual <u>Budget</u>	Variance to <u>Ann Budget</u>	Actual/Ann <u>Budget (%)</u>

## Billing Accuracy

The billing and collections division is responsible for the creation and distribution of accurate customer bills, resolving all billing complaints, interfacing with large non-residential customers and ensuring successful collections efforts to ensure the financial solvency of SWBNO. Accuracy of customer bills depends on measuring and reporting the actual water use of each customer. In addition, the integrity of the system relies on account investigations, as necessary, from either customer inquiries or from staff-initiated queries. The following metrics are monitored to help management measure and improve the bill accuracy, improve the customer response time and implement best practice collection activity.

**The Sewerage and Water Board (SWBNO) suspended water service shut-offs Thursday, March 12, and will adhere to this policy change for the duration of the Mayor's Declared Emergency proclamation in response to the COVID-19 pandemic.**

**The high number of estimated reads, caused by COVID-19 related staffing shortages and seasonal turnover, drive billing complaints and inaccuracies. To address this challenge, SWBNO has augmented its meter reading staff with 20 temporary employees to help our internal team provide actual reads of meters over the next three months.**

*\*Due to billing cycles, information on the number of estimated bills and number of meters read may overlap months causing some information to be reported in the following month's data.*

## Collections

A total of 74,232 payments were received in June. These payments are received via mail, walk-ins, online payments, and interactive voice response (IVR).

## Inter-Office Memorandum

---

**Date:** August 3, 2020

**To:** Board Relations

**From:** Melinda Nelson, Utility Services Administrator

**Re:** Extension of Avenu Insights and Analytics Contract for Information Systems Management

On January 30, 2020, the Board issued an RFP for Information Systems Management. After several extensions due to the Covid emergency, four responses were received on April 30. The evaluation committee met to begin the evaluation process on July 1, 2020, and reconvened on July 23, 2020. A notice to award to Avenu Insights and Analytics was sent out on August 28, 2020. However, on August 30, 2020, the Board received an appeal by one of the other bidders.

The current Avenu Insights contract expires on August 31, 2020. An extension is necessary to cover the anticipated period of the appeal and to continue to services provided by Avenu to the Board, currently estimated as two to four months. Approximately 90% of all Information Systems work at the Board is performed by Avenu and their DBE partner, Major Services.

Please place this item on the Finance and Administration agenda.

Thank you.

### Purpose and Scope of the Contract:

The purpose of this contract is to strengthen the main wind force resisting system at DPS 17/Station D. The building is showing signs of structural failures in the walls and floor slab. Large shear cracks have developed in every wall and in one area the concrete floor has broken in pieces.

The Original SOW consists of crack and joint repair to the brick masonry walls that are a part of the main wind force resisting system. These walls will then be filled with compatible injectable fill, helical tied and reinforced with hollowed steel bars. The hollow steel bars will tie into the roof diaphragm. Additional structural steel members are to be added to the roof truss system increasing the lateral load capacity bringing the roof up to current wind load requirements. Demolishing a brick/concrete staircase and upper level locker room/restroom is being done to relieve the floor slab from major loads. This will be replaced with a light framed plastic composite staircase.

### Reason for Change:

Design error/Omission <input type="checkbox"/>	Differing Site condition <input checked="" type="checkbox"/>	Regulatory Requirement <input checked="" type="checkbox"/>	Design Change <input type="checkbox"/>	Other _____ <input type="checkbox"/>
--	--	--	--	--------------------------------------

This change is being submitted due to an unforeseen condition found within the structural steel in the Annex side of DPS 17/Station D. The structural steel that's part of the roof truss was tested for lead contained within the paint/coating. Test were positive for containing lead. The reason why this has to be abated is because we are installing new structural steel around the perimeter of the facility. This new structural steel will be welded to the existing roof truss creating a diaphragm that will transfer wind loads to the walls, which is the main wind force resisting system. The abatement will be done using liquid chemicals in the spots where welding is taking place. This has been done already on the Pump Station side.

### Purpose and Scope of the Contract:

This agreement provides engineering services for the Joint Infrastructure Recovery Request (JIRR) program for Lakeshore-Lake Vista, Lake Terrace & Oaks, and Filmore neighborhoods.

Amendment No. 1 added FEMA's latest reimbursable surveying rate, at that time the rate was not to exceed \$7/LF. Invoices were paid based on the fair and reasonable negotiated billing fee based on the lineal feet (LF) of surveyed ordered.

Amendment No. 2 added program/project management (PPM) services; the total fee for this service was not to exceed 10% the cost of construction and added Seventh Ward, Treme-Lafitte and Tulane-Gravier neighborhoods.

Amendment No. 3 incorporated the Settlement, and other FEMA clauses, rescinded program/project management services, and set fees for RR engineering construction services associated with AES 01 – AES 03 for \$30,465.97. It also set a total value of the contract at \$1,650,267.62. Invoices are being paid based on fees negotiated for bid documents, design, bidding, construction administration, and record drawings. Because resident inspection is based on the contractor's schedule and performance, we have negotiated an hourly billing rate for this service with a Not to Exceed limit based on 6% of the cost of construction.

Amendment No. 4 incorporated engineering construction services for the following Recovery Roads (RR) projects:

- i. RR037 Filmore North Group A
- ii. RR038 Filmore North Group B
- iii. RR042 Filmore South Group A
- iv. RR043 Filmore South Group B
- v. RR069 Lake Terrace and Oaks Group A
- vi. RR072 Lake Terrace and Oaks Group D
- vii. RR073 Lake Vista Group A
- viii. DPW582 Oak Park Drainage

Amendment No. 4 also established the Contract Completion Date as 6/30/2023, which coincides Project Worksheet (PW) 21031, the FEMA Settlement.

**WHEREAS**, much of the physical infrastructure of the Board is powered by electricity self-generated at the Carrollton Water Plant (“CWP”) including Turbine 6 which self-generates 60 Hz power that can be converted to 25 Hz power using the Board’s Frequency Converter, 25 cycle electricity from four (4) turbines including Turbine No. 5, with additional capacity possible by using the 5 EMDs on site at the CWP; and

**WHEREAS**, on December 14, 2019, there was an explosion at the Board’s Carrollton Water Plant (the “Carrollton Plant”), involving Turbine No. 5 in particular (the “Incident”); and

**WHEREAS**, it has been determined that Turbine 5 will not be returned to service in the foreseeable future, resulting in the loss of up to 20 megawatts of 25 Hz power generating capacity;

**WHEREAS**, the failure to self-generate sufficient 25-cycle power, and/or to generate and convert 60-cycle power, places at risk the operation of the Board’s sewerage, water and drainage systems to provide essential potable water services, sanitary sewerage services and storm drainage services upon which the citizens of New Orleans rely; and

**WHEREAS**, restoration of the redundancy necessary to ensure timely and continued operation of the City’s stormwater drainage pumping system during major rain events, as well as the pumps used in the water purification process and potable water distribution, is of critical importance to the safety, health and welfare of New Orleans; and

**WHEREAS**, the Board staff has developed a project that, together with envisioned future projects, would constitute a comprehensive power restoration program to restore the power lost from the T5 explosion Incident, including the Purchase and Installation of a Turbine-Generator No. 7 (the “TG7 Project” ) requiring an estimated \$20,700,000.00 to complete; and

**WHEREAS**, the Board wishes to submit an application to the LA Office of Community Development-Disaster Recovery Unit to secure \$13,000,000.00 in Community Development Block Grant-Disaster Recovery (CDBG-DR) funds to partially cover the cost to complete the “TG7 Project,” and
